The vehicle body parts

Which parts

of this vehicle

can transmit the engine's power ?

Four components can transmit the vehicle's engine's power :

THE WHEELS

Each wheel has two components:

They are essential on wet roads !

The tyres

When you change the tyres, you must change:

Two by two **or** **four by four**

But, never one by one

This car has two font-doors , it's a coupé

On the front, you can see a yellow one

and on the back the white one,

do you know them ?

It's the license plate

This part of the body could be made of steel, made of glass, what's this name ?

It's the roof panel

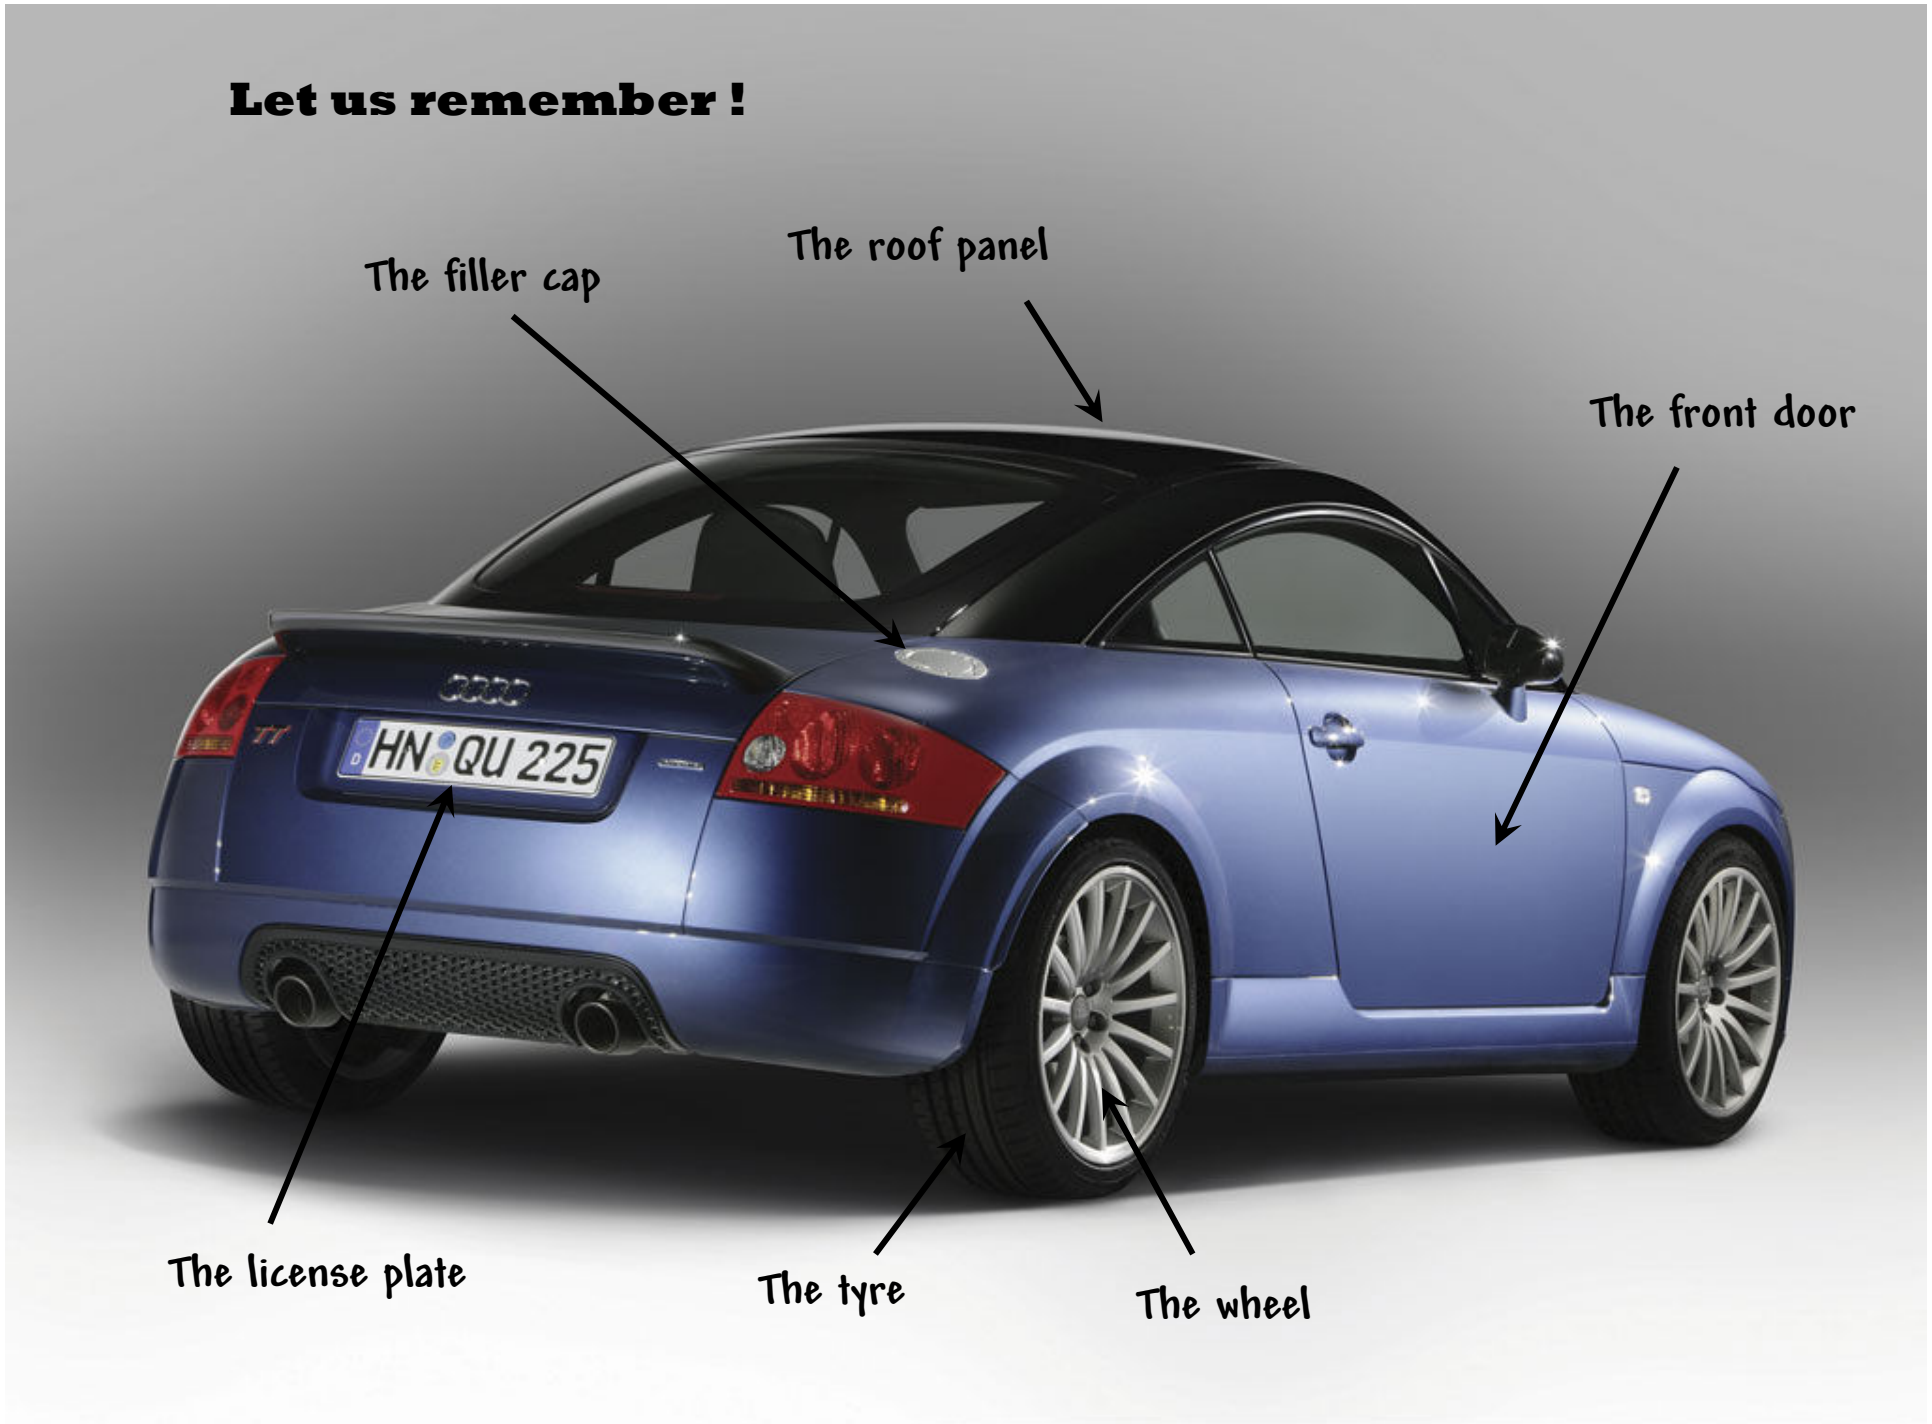
When you want to full-up the tank,

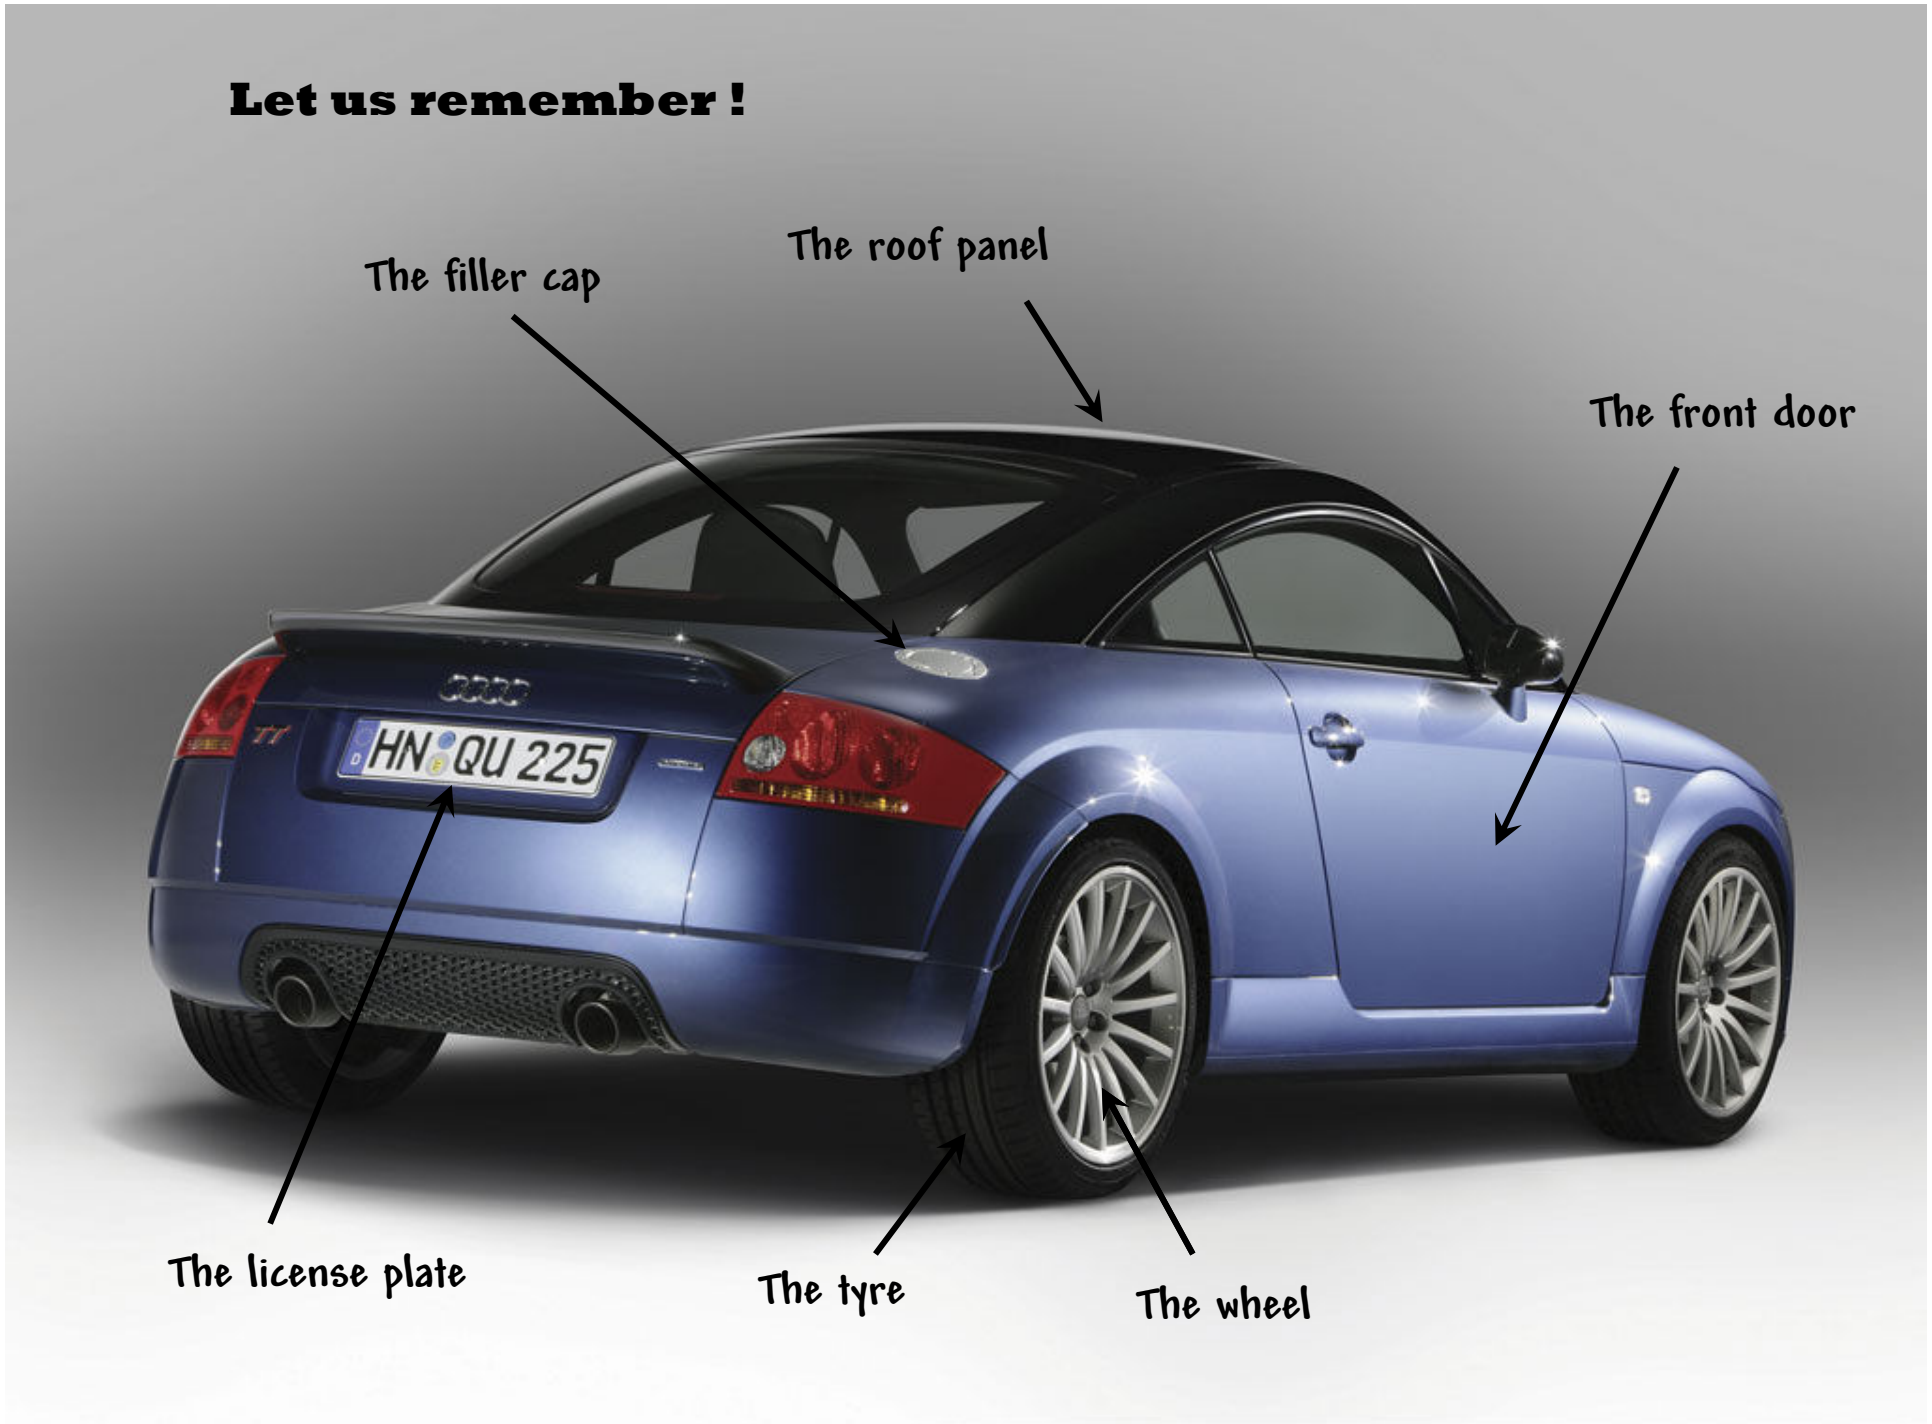
what must you open ?

You must open

Let's remember !

Let us remember !





Let us remember !
